An Exploration of Dynamic Markov Coinpression A thesis submitted in partial fulfilment of the requirements for the Degree of ... Abstract Data Compression is the process of removing redundancy from data. Dynamic Markov Compression (DMC), developed by Cormack and Horspool, is a method for performing statistical data compression of a binary ...

In this paper we explore the dynamical states possible in the WINDMI model of Horton and Doxas [1998]. The WINDMI model follows a long tradition, begun with Lorenz [1963] for atmospheric dynamics, of projecting a set of partial differential equations (PDEs) onto a relatively small set of moments in order to study the dynamical properties of a system.
