Abstract. Based on the methods outlined in Determining the Ark Kinds (Lightner et al. 2011), information on the class Mammalia was evaluated in an attempt to get a realistic estimate of what mammalian kinds would have been represented on the Ark. Examining information on extant species (those alive today), it was estimated that they represent 137 created kinds.

A: You could find out who currently owns the mineral rights under the property by searching the land records at the county clerk's office, or online. In lieu of that you could contact a local abstract office and have them do the search for you. The county clerk's records can be searched for free however so I'd try that first.
