Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts interact with each other in multiple ways, culminating in a higher order of emergence ...

Complexity - Wikipedia

1. Definition of accounting: "the art of recording, classifying and summarizing in a significant manner and in terms of money, transactions and events which are, in part at least of a financial character and interpreting the results thereof".
