

function generator manual pdf

Introduction The FG085 is a low cost versatile function generator capable of producing continuous signal, frequency sweeping signal, servo test signal, and user defined arbitrary signals. It was designed as an easy-to-use tool for electronic hobbyists. The operation of FG085 is extremely straightforward. The following examples will lead

synthesized function generator with built-in arbitrary waveform capability. Its combination of bench-top and system features makes this function generator a versatile solution for your testing requirements now and in the future. Convenient bench-top features 10 standard waveforms Built-in 12-bit 40 MSa/s arbitrary waveform capability

Agilent 33120A 15 MHz Function / Arbitrary Waveform Generator

The heart of the function generator is a VCG (voltage-controlled generator) that produces precision sine, square, or triangle waves over the 0.2Hz to 20MHz range. This encompasses subaudible, audio, ultrasonic, and RF applications. A continuously variable dc offset allows the output to be injected directly into circuits at the
