

**open source graphhopper directions pdf**

OpenStreetMap (OSM) is a collaborative project to create a free editable map of the world. Rather than the map itself, the data generated by the project is considered its primary output. The creation and growth of OSM has been motivated by restrictions on use or availability of map information across much of the world, and the advent of inexpensive portable satellite navigation devices.

**OpenStreetMap - Wikipedia**

Thanks Melissa! ðŸ™, We didnâ€™t release a Google map with directions for a couple reasons. Google maps itself only allows maps with up to 10 waypoints at a time, so we would have had to split the trip up into 5-6 different maps.
