restoration goal. I posit that the topography of coastal dune ecosystems is core to their multi-functionality and therefore assess the restoration of the topographic profile after mining. In this study area, mining destroys the coastal dune forest vegetation and the topographic profile of dunes (van Aarde et al. 1996c).

Chapter 3 Assessing the Restoration of Coastal Dune

California coastal dune ecosystems are prime targets for conservation and restoration efforts due to their high native plant diversity and rates of endemism. Invasive dune species such as European sea rocket (*Cakile maritima*) may disrupt key ecosystem processes by altering dune physical processes and

Coastal dune invasion and restoration at Point Reyes

Restoration measures consisted of re-introducing traditional management techniques in dune slacks, such as mowing, grazing and sod removal, or constructing artificial dune slacks to compensate for lost biodiversity elsewhere.

Restoration of coastal dune slacks in the Netherlands

Coastal Dune Restoration Project. Point Reyes National Seashore (Seashore) has issued a Finding of No Significant Impact (FONSI) (530 KB PDF) for the Coastal Dune Restoration Environmental Assessment (13,741 KB PDF) to improve and restore coastal dune habitat of critical ecological importance in the park. Under this planning process, the Seashore is proposing to restore up to 600 acres of ...

Native Plants for Coastal Dune Restoration: What, When, and How for Florida : Introduction. Coastal Ecology

. This publication was developed to help people on Florida's coast select and use plants for coastal stabilization and habitat restoration. It is a revision and expansion of

Native Plants for Coastal Dune Restoration - USDA

Starting in 2001, Willapa National Wildlife Refuge began a process of coastal dune restoration efforts to enhance the recovering of the threatened western snowy plover. The results of this on-going restoration have had benefits beyond plover nests.

Restoration of Coastal Dunes - Willapa - U.S. Fish and

Coastal dune restoration typically takes place in areas of high ecological and other resource importance. The EA identifies a wide variety of measures to avoid or minimize impacts, including minimizing implementation during the breeding season for various threatened and endangered species and establishing buffers between work areas and documented nests and breeding habitat, wetlands, and organic pastures.
