Statistics For Psychology | Download eBook PDF/EPUB

divergent views of probability and statistics. The eminent statistician Karl Pearson (the guy who invented the correlation coefficient) was so enthralled with probability and statistics that he seems to have believed that understanding probability and statistics is a cornerstone of human understanding.

A Review of Basic Statistical Concepts - SAGE Publications

In terms of utility, statistics is divided into descriptive and inferential statistics. Psychologists use descriptive

statistics to describe research data succinctly. The sample statistic (e.g. the sample mean, \bar{X}) thus obtained is used to derive the test statistic (e.g. the student-t) that features in inferential statistics.

regarding the relationship between causal explanation and empirical prediction. In many scientific fields such as economics, psychology, education, and environmental science, statistical models are used almost exclusively for causal explanation, and models that possess high explanatory power are often assumed to inher-

To Explain or to Predict? - Department of Statistics

A refreshing and much-needed introduction to statistics in psychology for students who 'don't get numbers'. Jones breaks from the traditional, numerical approaches, drawing on non-numerical examples and scenarios from both psychological literature and everyday life to explain key statistical concepts.
